

Vijay Industry and Mobile Technology

Leading the Future of Mobile Repair Machinery with 8 years Experience

About Vijay Industry and Mobile Technology

Vijay Industry and Mobile Technology is a premier manufacturer specializing in advanced mobile repair machinery. With years of engineering expertise, we've established ourselves as a trusted partner for repair shops and technical professionals worldwide.

Precision Engineering Excellence

Our commitment to quality, innovation, and customer satisfaction drives everything we do—from product design to after-sales support.

The Mobile Repair Industry Today

Explosive Growth

The mobile repair market is experiencing unprecedented expansion, driven by increasing device ownership and rapid technology cycles.

Professional Demand

Repair shops require professional-grade equipment to handle diverse devices efficiently while maintaining precision and quality.

Technical Complexity

Modern devices feature curved displays, edge-to-edge screens, and paper displays—requiring advanced repair solutions.

Introducing Our All-in-One OCA Lamination Machine

Engineered for precision, efficiency, and professional results in every repair.

Fully Automatic Operation

Streamlined process from loading to completion—reducing human error and increasing throughput.

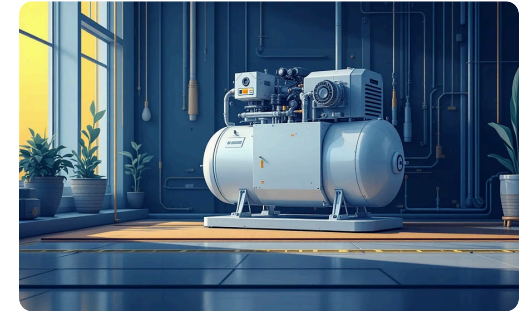

Integrated Punching System

Eliminates manual cutting with precise, consistent results for perfect fit every time.

Advanced Bubble Remover

Vacuum technology ensures flawless, bubble-free lamination for professional-grade repairs.

Inbuilt Compressor

No external equipment needed—everything integrated for seamless operation and portability.

Key Features & Benefits

Universal Display Compatibility

Handles edge displays, curved screens, flat panels, and paper displays with equal precision—no matter the device type or screen technology.

Multi-Device Support

Compatible with Android smartphones, iPhones, smartwatches, and tablets.

High Precision & Efficiency

Engineered for accuracy down to the micron level, ensuring perfect alignment and professional results every time.

User-Friendly Interface

Intuitive controls and automated processes make complex repairs accessible—even for technicians with limited experience.

Professional-Grade Build

Branded components and robust construction ensure reliability, longevity, and consistent performance in high-volume environments.

VIMT50 PRO

**-Android Model – Power Meets Precision
Engineered for Excellence**

The VIMT50 PRO is designed specifically for Android, Iphone & Smart Watch device repairs, offering unmatched versatility and speed. Perfect for high-volume repair shops handling diverse Android brands.
